► TU Delft Impact Contest Finalist
2021

► Top Digital Talent Under 25 - Variety
2020

Education:

Delft University of Technology

BSc Computer Science

2018-2022

Experience

Fair ML Research

TU Delft

2022 - As part of my bachelor thesis, I conducted research on fairness in Machine Learning for the Delft University of Technology. In particular, I investigated the extent to which background shapes the way ML practitioners consider ML harms. For this work, I got a 9.0/10 in my bachelor thesis which can be found [here](#).

Android Developer

Filmmate

2021 - Working as an android developer for Filmmate I had the chance to get myself involved with exciting technology ranging from messaging to recommender algorithms. I also had the chance to work with an extremely enthusiastic group of people. Filmmate is an internet movie database with user interaction capabilities.

Blockchain Data Insertion

Europol

2019 - I conducted research for Europol on data insertion in Bitcoin blockchain mechanisms and how this can be abused by criminals. Our team ended up being rewarded for our outstanding performance after developing a web app with this technology.

Frontend Developer

Maastricht Disrupt

2019 - I took over the Web & Tech department from Maastricht Disrupt. MD is a foundation for creative problem solving. Each year, they organize one of the biggest design conferences in the Netherlands.

Speaker

TEDxDelft

2019 - After conducting research in natural disaster detection for La Salle University, I participated in the TEDxDelft award, organized by my university, in which I got the chance to present my work.

Profile:

I am a Computer Science graduate with extensive experience in software development and design. I am looking for an opportunity to work in a fun and challenging work that enables me to learn and also to contribute with my skills and ideas.
